

Register yourself and your class for the frontrunner group!

in Europe at school

Knowledge of recent history, citizenship and media literacy helps youths grow up to be empowered Europeans.

Do you you want to make history in education?

Your knowledge and experience, but also the feedback of your students, are vital to the creation of the in Europe education kit.

Test it in your class and share your experiences
with VPRO.

What has happened in Europe
over the past 20 years?

in Europe

history caught in the act

Ten years ago, VPRO broadcasting company worked with the author **Geert Mak** to create the television series **In Europe** about the history of the 20th century.

In the autumn of 2019, a follow-up series will be made focusing on the turbulent years since 1999. Where on earth did we go wrong these past two decades? What is left of all our great expectations?

In Europe at school

In line with the television series, VPRO is working with VGN and Euroclio to create an interactive education kit for students in grades 3 and 4 of senior secondary education and pre university education or grade 4 of prevocational secondary education which will contribute to forming opinions, citizenship and media literacy.

Make your own In Europe

A clear video instruction, tailored excerpts from the series, and an education letter to facilitate teachers and students in making videoclips. A one-of-a-kind European exchange project, in which students film their recent history, and research and compare themes like democracy, human rights, privacy, climate change and migration.
